

The Diver Solution

An end to end business intelligence solution from Dimensional Insight

Getting the
right information,
to the right people,
at the right time.

Dimensional Insight's Diver Solution - a powerful data analysis, reporting and information delivery system - integrates the volume and variety of data your organization collects and stores, and turns it into meaningful information that people can use in their day-to-day activities. It delivers information in the form of reports, charts, and analytical applications directed specifically to the individual so they can make better and timelier business decisions.

Dimensional Insight delivers a comprehensive and fully integrated set of business intelligence capabilities, while providing rapid implementation and a lower total cost of ownership. The solution provides a unified technology foundation consisting of ETL, security, analytics, and portal components. This allows for a single point of administration and alleviates the need to manage and maintain multiple dispersed programs.

- ❖ **Improve** your organisation's ability to make timelier and more accurate decisions.
- ❖ **Obtain** all technology capabilities without restriction or high server-based price tags.
- ❖ **Expand** seamlessly as your needs evolve.
- ❖ **Provide** information that is tailored to the different groups of users who access the system.
- ❖ **Reduce** the time IT staff spends creating, modifying and supplementing reports for the business.

3 steps to success in today's competitive market

Data Collection

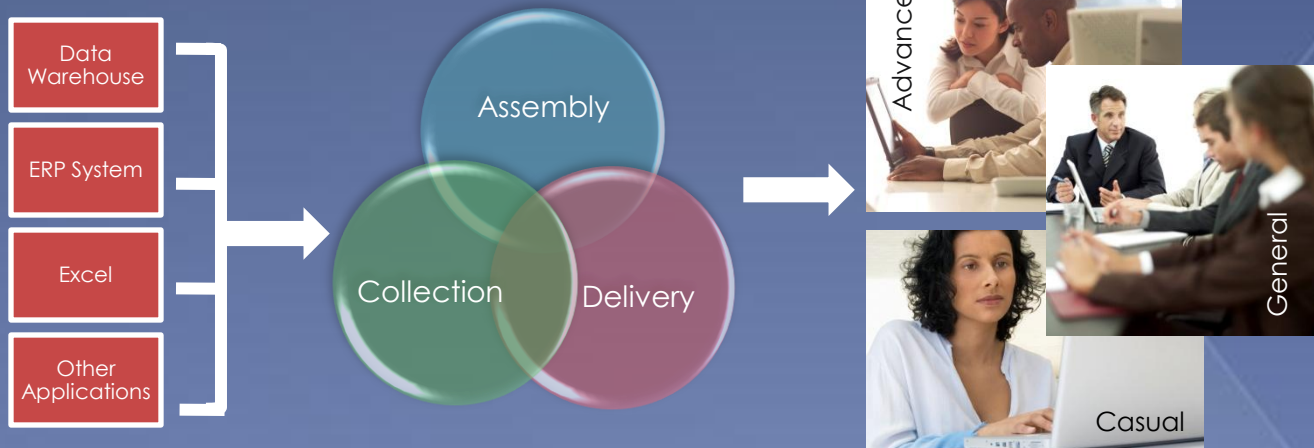

The Diver Solution provides the ability to extract data from any source system.

Data Assembly

Once your data has been identified and collected, the correct business rules and data relationships are established to create an application that will meet user needs.

Information Delivery

Diver can produce a variety of reports to multiple users (advanced, general or casual) in a variety of formats.
